---

## PROJECTS

---

### **Career assistance based on new education system**

july 2021 - Mar 2021

- The project is based on the new online education system where both students and teachers can enroll
- Admin has the whole access to both the teachers and students accounts
- Here admin can post the tests, courses etc for students to give the test.
- Students can login and give the test and results will be displayed and also inform the area in which students are weak.
- It makes the work of teachers easy and also helps students for knowing the area in which they are weak.

### **Car Dekho Application**

May-2023 to May 2023

- The user can use this Application to search for a car, add car details, delete car details, update car details, and so on.
- When the user wants to either buy a new car or make changes to his account, he can complete all of the essential tasks.
- Looping statements, decision making statements, and the fundamentals of core Java are employed.
- CoreJava was utilised as the programming language.

### **Restaurant Website**

Mar-2023

- A restaurant website contains all of the restaurant's information.
- It includes all of the meals available at the restaurant.
- Separate sections are focused on the particular dishes of various states, and the photographs are hyperlinked so that customers can simply click and acquire all the data about the meals.
- The website also includes the restaurant's contact information.
- HTML and CSS are the languages that were utilised.

---
